

NotificationWall::addToWall

NotificationWall::NotificationWall

NotificationWall::getFont

```
graph LR; A[NotificationWall::addToWall] --> C[NotificationWall::getFont]; B[NotificationWall::NotificationWall] --> C;
```

The diagram illustrates a dependency or relationship between three methods of the NotificationWall class. Two methods, NotificationWall::addToWall and NotificationWall::NotificationWall, are shown on the left, each with a blue arrow pointing to the NotificationWall::getFont method on the right. The NotificationWall::getFont method is highlighted with a gray background, indicating it is the target or a critical component.
